WEATHERSHIELD WALLS

Weathershield walls can be pre-installed ready to roll up or down during your event. We offer a clear vinyl (see through) walls. These walls can also be used individually to block certain areas of the tent for styling purposes, create noise barriers or simply block areas you dont want guests to see.

LIGHTING

The Lighting Package includes both the Interior and Exterior of the Aurora Tent.

Main lights are installed 3 quarters up each centre pole facing upward to the tent sail top. We then install white/black hanging festoon lighting around the perimeter of the tent and extend it outward to the exterior of the tent using stakes & tall bamboo poles. Each lighting layout is customised to each event.

Just a quick email to touch base to say thank you again. From my first enquiry you were prompt, fuss free, extremely accommodating and we feel you keenly invested in making our night exactly how we envisioned. Everything, especially your Aurora Tent and lighting looked incredible on our day and everyone commented on the tent!! It makes us so excited and happy when we think about our wedding and we will recommend you over and over again.

I just wanted to pass on our thanks to you for your assistance in the lead up to the wedding, and to Brendan and the boys for their tireless work in getting everything set prior to our families and friends arriving. Driving 17 hours and then getting everything set in time was no mean feat!

GRACE. K

NICOLE. B

Communication was fantastic, from the quoting stage all the way up to the day before, they were just on the ball. They were really transparent about the availability of some of the products I was after and kept me up to date the whole time, when something wasn't available they had other options and never kept me in the dark.
