HOW I SHOOT MY WEDDINGS

the experience

My method is the best one because...

You're wanting to personalise your wedding day to make it feel special, and not the same as every other wedding that you have been to. We can work together to figure out exactly what that is. Cut through all the madness of organising a wedding and make it simple. Your day won't be stressful as I am calm and organised. You won't feel silly asking a million questions, ask as many as you want it doesn't bother me!

Let's make it the best day ever! I'll come hang with you and your best friends while you pop a bottle of champagne. Your mother can do up the final button on your wedding dress. The girls will cry when we do the first look of you all dressed. I'll meet you at the ceremony and capture the moment that your love first sees you as you walk down towards him. The first kiss and celebration of your vows captured with me poking my head up from between your guests. Then we do a champagne shower at sunset to celebrate with some divine couple photos. Before kicking off your shoes and dancing the night away!
