About me

Born and bred in Geelong, Victoria, I always had a camera in my hands from a very young age. I started back in the good old days of film...(that might be giving away my age a little), with my then dream job of being a band photographer. You name them, I photographed them!

Moving to the big smoke, I finished my Fine Arts degree and creatively, productively and passionately my photography began to evolve, as too did the digital era. My camera was upgraded and so was my knowledge and experience...and developing style.

Fast forward to 2 years ago, when I met the love of my life in Europe. We got married and now share our time between the two countries. Dream man and dream job, shooting weddings all year round, chasing summer and wedding season where my camera continues to take me on adventure after adventure. Where ever I lay my hat, that's my home. But nowhere feels more like home than when I am behind the camera.

So if you like what you see let's get face to face, I would love to meet with you. And don't let the distance scare you. I am always available on Skype, Facebook messenger, Viber or any other of today's technological options. Let's chat! Looking forward to meeting you.

Diane x
